

NIPPLE FLOAT CUP

(For Round Pipe: 25mm)

Code: NFCR

(For Square Pipe 22mm)

Code: NFCS

Nipple Float Cup is a perfect solution product in the poultry industry, specially designed to meet needs of modern farmers. Float Cup is perfectly used from the day old chicks to matured birds. For one day chicks one can lower the line in such a way that cups stand on the floor and as the birds grow, rise the line up.

- # Nipple Float Cup is perfect for hot weather conditions
- # The water in the pipe gets hot, and when it comes to the cup, it cools down due to the natural evaporative cooling effect
- # Level of water in the cup is automatically regulated
- # Thus, birds always have access to fresh cool water
